

SENIOR ANALYST, OPERATIONAL TECHNOLOGY

Nuneaton

Full Time, FTC 12 Months, Hybrid Working

YOU'LL MAKE CONTRIBUTIONS THAT MATTER BY...

- Working as part of the Operational Technology (OT) function based at Nuneaton, to deliver the OT agenda across SDUK Manufacturing and Logistics sites.
- Specifying, developing, and implementing OT systems to defined business requirements and standards, including the delivery of project activity.
- Delivering technical development, administration, including preventative and corrective action to maintain OT systems performance, availability, and security.
- Managing technical change, with appropriate assessment of risk, recovery processes and communications to ensure successful delivery.
- Providing OT support to the business, to ensure operational continuity and relevant performance standards are maintained. Uses problem solving methodologies, including root cause analysis to understand and resolve issues.

YOU'RE BEST SUITED FOR THE ROLE IF YOU ARE...

- Previously experienced in a comparable technical role, preferably within an operational environment and level 5 qualified in IT/OT (i.e. HND) or equivalent experience in a related technical discipline.
- Technically knowledgeable in common applications and infrastructure environments (i.e. Microsoft Windows Server, Group Policy, Active Directory, Veeam, VMWare Virtualisation, SAN solutions) and interface types, preferably within an operational environment.
- Able to demonstrate an understanding of cyber security best practice and controls, and their application within an organisation to improve security posture.
- Experienced in problem determination and resolution, including use of root cause analysis methodologies.
- An excellent communicator who can understand and document requirements and processes, and provide updates to key stakeholders.
